

US-2 MiniStation

The US-2 MiniStation is an automatic welding system designed with the emphasis on low weight, compactness and flexible use.. The picture show of automation orientation of the basic unit you choose can be expanded or modify as required, depending on the application. The welding head can be combined with suitable column & Boom for a total solution to a specific welding problem.

The MiniStation SAW head can be equipped with multi-kind of branded power source such as Lincoln DC-1000; Miller DC-1000...etc

Max Welding current	: 1000 A
Duty cycle	: 100%
Electrode diameter, (mm)	: 1.6 ~ 4.0
Wire feed speed, (m/min)	: 0.4 ~ 3.5

US-6 HeavyStation

The US-6 HeavyStation is the complete system for heavy duty automatic welding system,operational reliability and durability. The welding head can be combined with suitable column & Boom for a total solution to a specific welding problem.

The US-6 HeavyStation SAW head can be equipped with multi-kind of branded power source such as Lincoln DC-1000; Miller DC-1000...etc

Max Welding current	: 1250 A
Duty cycle	: 100%
Electrode diameter, (mm)	: 1.6 ~ 5.0
Wire feed speed, (m/min)	: 0.4 ~ 3.5
