

Flux Rebakes Ovens

Main Features

- ✓ Built-in temperature regulator permits free temperature setting up to 400 degrees Celsius.
- ✓ Manually adjustable thermostat ensures temperature maintenance and regulation.
- ✓ Use of special heater allows less watt-density and less power consumption per unit space as well as high thermal efficiency.
- ✓ Pre-eminent in sustaining temperature, as a result of double wall design and use of high quality special insulation materials.

Flux re-bakes ovens are designed for automatic re-bake of SUBMERGED ARC FLUX. WELTRON has developed and markets various models; By simple turn the baking timer (0-2 hrs); the oven re-bake flux at an adjustable temperature of 50-300°C for an adjustable timer 0 ~ 2 hrs), Automatic resets to an adjustable storage temperature after bake cycle.

Technical Specifications

Model	WFO 100LB	WFO 150LB	WFO 200LB	WFO 100RB	WFO 200RB
Storage Capacity Kg	100	150	200	100	200
Outer Dimension (H x W x D), cm	125 x 65 x 50	150 x 65 x 50	170 x 65 x 50	145 x 51 x 125	160 x 61 x 140
Re-bake Temperature °C	50-400				
Holding Temperature °C	50 - 200				
Heater Capacity Kw	3	3	4.5	3.6	4.8
Control Type	Run back timer			Digital timer	
Power Supply	AC 230v, 1 Phase, 50 Hz		AC 415v, 3 Phase, 50 Hz		
Temperature Control	Thermostats				
Shipping Weight Kgs	85	95	100	225	260
