

# Vacuum Fitter

## Main Features

- ✓ Economic vacuum with only pressed air in, works without vacuum pump
- ✓ No damage on welding objects.
- ✓ Shorten working time.
- ✓ Light weight.
- ✓ More effective on non-Polaris material like Nickel, which improves working efficiency and quality.
- ✓ Regular gap for instant welding makes easy permanent welds.

**V**acuum Fitter is for fitting welding objects and is powerful to solve various complicated trifling matters. This device provides an ideal solution for holding material in position for welding. The use of this Vacuum Fitter will contribute greatly for saving time energy and manpower in large projects like ship building, bridge construction.

## Technical Specifications

Model	WVF 100
Clamping Power	1,000 Kg
Pad Size (Diameter)	300 mm
Pressure	235 Kg/cm <sup>2</sup>
Weight	25 Kg
