

Welding Water Cooling Unit

Specification

Model	WT-380C
Input supply	AC 240V/1Ph/50Hz
Water output pressure	24 Kg / cm ²
Water output flow	40L / min
Water tank capacity	20L
Cooling ability	850 ca / hr
Permit temperature	80°C/ Normal water circulation
	60°C/ No water circulation
Diamension	L55cm x W35cm x H45cm
Weight	N.W. 22.6kg. G.W.24.6Kg

Feature:

- Stainless steel water pump & 2 litter stainless steel tank.
- Pump & the motor direct coupling, simplify the control circuit and reduce fault , 8" fan to cool the motor
- Build in flow control valve for adjusted of flow pressure.
- The electric wire connection box of the motor has power on/off switch & fuse protection avoid the short circuit takes place in the aqueous vapor.
