

Three Jaws Chuck

K11

Weltron three jaw welding chucks are self-centering to center the workpiece automatically and have the inside and outside clamping capabilities and serrated hardened steel jaws mean one handed tight gripping action, so there's no awkward fumbling – no time consuming adjustments. Maintenance free, and the long jaws are removable and reversible for a variety of stability combinations.

Model	Inside clamp Range (mm)	Outside clamp Range(mm)	Bolt side (mm)	PCD (mm)	Pass hole (mm)
K11-80	∅ 2 ~ 22	∅ 25 ~ 70	3x M8	66	16
K11-250	∅ 6 ~ 110	∅ 80 ~250	3x M12	226	130
K11-380	∅ 11.5 ~ 210	∅ 95 ~400	3x M16	350	135
K11-500	∅ 25 ~ 280	∅ 150 ~500	3x M16	465	210
K11-630	∅ 50 ~ 350	∅ 170 ~630	3x M16	586	252
